ARDIAN MEHAJ

Junior software developer | Python & TypeScript

Brussels, Belgium | mehajardian@gmail.com

Portfolio | GitHub : LuxuriantTech | LinkedIn : Ardian Mehaj

PROFILE

My personal projects focus on API checks, document review and web applications. I use AI coding assistants for implementation, define expected behaviour and review the results. I am looking for my first development role with code review and practical feedback.

SELECTED PERSONAL PROJECTS

API Contract Guard

TypeScript, Node.js, OpenAPI

- Local CLI comparing five categories of API contract changes, with JSON/HTML reports and explicit rejection of unsupported inputs.
- Defined the supported checks and expected reports; reviewed the assisted implementation and test cases. Published validation records 102 local tests.

EvidenceDesk

Python, FastAPI, React, PostgreSQL, Redis

- Local document-review prototype with background processing, source citations and access controls.
- Framed the citation and abstention workflow and iterated with coding assistants. The published evaluation fell short; limitations remain documented.

Synthévia

React, TypeScript, FastAPI

- Web workspace for market information and learning, with a public demo using fictional data.
- Define product needs and coordinate implementation and reviews. The separate public code sample connects React, FastAPI and SQLite.

TECHNOLOGIES USED IN THESE PROJECTS

Python, TypeScript/JavaScript, SQL, React, FastAPI, REST APIs, PostgreSQL, Git, Docker, pytest, Playwright and GitHub Actions. Programming independence is still developing.

EXPERIENCE

Delhaize, Brussels | Student employee | 2020 - 2022

Coordinated daily tasks with colleagues and helped organise the team when the manager was absent.

Volunteer tutor | 2020 - present

Explain mathematics, science and business topics in clear steps, adapting to the learner.

EDUCATION

OPIT | BSc (Hons) Computer Science, online

Classes started 21 September 2026. Online studies compatible with full-time work.

Institut Technique René Cartigny | CESS | June 2025

Completed Belgian upper-secondary education, polyvalent mechanics.

CERTIFICATIONS & LANGUAGES

IBM Data Science Professional Certificate | Coursera | 21 October 2026.

IBM RAG and Agentic AI Professional Certificate | Coursera | 20 October 2026.

HackerRank: SQL Advanced and Python Basic, September 2026.

French: main language | Albanian: native | English: EF SET 77/100, C2 overall (18 September 2026).

Belgian citizen, EU work authorisation. Seeking full-time employment, preferably remote from Belgium.
