ARDIAN MEHAJ

has successfully completed the online Specialization

HBR Guide to Generative AI for Managers

Today's managers are expected to do more with less time, and generative AI is quickly becoming a core part of how that happens. In this specialization, based on the HBR Guide to Generative AI for Managers, you'll learn how to use gen AI as both a Co-Pilot for fast execution and a Co-Thinker for deeper reasoning across every part of your role. You'll build practical skills across personal productivity, team leadership, and strategic decision-making, using generative AI to draft communication, navigate team dynamics, analyze data, and evaluate business strategy with more confidence.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
